		Rev. No	1

As CIRAV GIDA, we commit ourselves by using current and valid knowledge to identify, minimize or prevent the environmental impacts that will arise as a result of our activities in all our factories.

We see the environment as the most valuable inheritance to be left to future generations and we believe that it must be protected in the best way.

For this reason:

- We reduce as much as possible the factors affecting the environment during and after our activities.
- *We comply with relevant laws and applicable standards on environmental protection, deforestation, biodiversity, waste and wastewater management.*
- We try to use reusable and recyclable products and to minimize natural resource consumption.
- *We work in accordance with relevant laws and applicable standards on human rights, workers' rights and conditions, health and safety.*
- We comply with the provisions of the regulations that apply to our activities.
- We work to carry out the necessary research and development projects to reduce wastes at their source, to recover non-improvable wastes, and to dispose of non-recyclable wastes by appropriate methods that do not cause environmental pollution.
- We organize trainings that increase the environmental awareness of our employees.
- We provide all our employees, guests, suppliers and subcontractors with information about our Environmental Policy.
